ABOUT ME

Senior Angular Developer with 6+ years of experience building complex, high-performance web applications (CRM, fintech, e-commerce).

Expert in Angular (v10–17), TypeScript, RxJS, and modern reactive patterns including Signals. Strong experience in designing scalable front-end architectures, reusable component libraries, and optimizing performance for data-heavy applications.

Experienced in leading features end-to-end, collaborating with cross-functional teams (BE, QA, Design), and improving code quality through best practices and code reviews.

Focused on performance, maintainability, and delivering high-quality user experience.

Open to remote opportunities worldwide

WORK EXPERIENCE

ClearBlueDesign | 04.2024-09.2025

Project: Printing Source (E-commerce Platform) - an app for ordering printed items

- Developed enterprise-level, high-load Angular applications (Angular 17–18)
- Worked with Angular Signals for reactive state management
- Applied modern Angular patterns (standalone components, new control flow)
- Implemented scalable UI features used by end-users in production environment for e-commerce platform (printing system)
- Designed reusable components and modular architecture
- Built and optimized data-heavy UI (tables, forms, filters) with focus on performance and scalability
- Improved application performance by reducing unnecessary re-renders and optimizing change detection in data-heavy components
- Collaborated with backend team for REST API integration
- Typescript, Angular 18, RxJS, Bootstrap, HTML5, SCSS, Git
- Application architecture
- Worked with large-scale, data-heavy interfaces
- Took ownership of features from requirements to production delivery
- Delivered production-ready features with focus on performance and scalability

Project: RBI League (MLB Sports Application) - major League Baseball app

- Developed UI features for a large-scale sports application with high user interaction (MLB-related system)
- Improved UI responsiveness and reduced rendering overhead in complex views
- Refactored legacy code to improve maintainability
- Worked with reactive data flows using RxJS
- Typescript, Angular 17, RxJS, Bootstrap, HTML5, SCSS, Git

CodiQ | 05.2023-03.2024

Project: Factory Automation - system for automating processes in factories.

- Developed UI for industrial automation system
- Built complex forms and dashboards for operational workflows
- Integrated frontend with backend services (REST API)
- Improved code quality and fixed critical issues
- Typescript, Angular 13, RxJS, Angular Material, HTML5, SCSS, Bitbucket

ANDERSEN | 12.2018-02.2023

Angular Developer / Tech Lead

- Developed enterprise-level applications in fintech and internal systems
- Led frontend development for internal company portal (as Technical Lead)
- Designed and implemented application architecture and reusable components
- Worked with NgRx for state management (store, effects, selectors)
- Built complex UI features: dashboards, forms, data tables
- Collaborated with cross-functional teams (BE, QA, Design)
- Participated in architectural decisions and technical discussions
- Improved performance and optimized large-scale applications
- Worked in Agile/Scrum environment
- Mentored junior developers and participated in code reviews

Project: Online Banking (Fintech) - the project is a system for recruiting and accompanying candidates until the moment of employment.

- Developed high-load UI for banking-related workflows
- Worked with reactive data flows (RxJS, NgRx)
- Built forms, dashboards, and data-driven components
- Typescript, Angular 13, RxJS, NgRx, GraphQL, HTML5, SCSS

Project: Andersen Portal - the project is information about employees (personal data, company projects, etc.), information about the news and events of the company with the possibility of creating them.

- Contributed to solution architecture design and technical decisions
- Led frontend development and contributed to architecture design
- Developed reusable components and internal UI modules
- Typescript, Angular, RxJS, SASS, Git

Project: VTB Bank - development of the GTB reporting module for the corporate business portal.

- Developed reporting module for corporate banking system
- Built UI components and integrated with backend services
- Typescript, Angular, RxJS, SASS, .NET Razor

CORE SKILLS

- Angular (10–17), Signals, Standalone Components
- TypeScript, JavaScript (ES6+)
- RxJS, NgRx (Store, Effects, Entity)
- Reactive Forms, Complex Forms Handling
- REST API Integration
- Performance Optimization (change detection, memoization, lazy loading)
- Architecture & Scalability
- UI Libraries: Angular Material, Bootstrap, Taiga UI
- HTML5, SCSS (Flexbox, Grid, responsive design)
- Git (GitHub, GitLab, Bitbucket)
- AI Tools: GitHub Copilot, Cursor
- Unit Testing (Jasmine), E2E (Cypress – basic)
- CI/CD (basic understanding)

EDUCATION

Courses - IT-Step

Software Engineering
2015/2018

Belarusian Trade and Economic University of Consumer Cooperatives

Economics and legal support of economic activity
1999/2004

LANGUAGES

- English — B1–B2 (daily communication with international teams)
- Russian - Native
